

David Kimmel

GIS Developer & Cartographer
Active TS/SCI with CI Polygraph

Fairfax VA, 22030 
(443) 536-6606 
Kimmel.David@gmail.com 

Full-stack geospatial professional with a master's in GIS & Cartography and 5+ years of experience developing spatial tools, automating remote sensing workflows, and designing interactive maps. Skilled in Python, JavaScript, and open-source geospatial libraries. Background in imagery science and cartographic production for national defense, now seeking remote-first roles in mapping, data visualization, and geospatial analytics.

Skill Highlights

GEOINT Tools

- | | | | |
|--------------|-----------------------|--------------|--------|
| ▪ Socet GXP | ▪ ArcPro/ESRI suite | ▪ RemoteView | ▪ ENVI |
| ▪ QT Modeler | ▪ Google Earth Engine | ▪ GDAL/OGR | ▪ QGIS |

Developer Tools

- | | | | |
|-----------|----------------------|------------------|--------------------|
| ▪ AWS | ▪ Visual Studio Code | ▪ Andriod Studio | ▪ Jupyter Notebook |
| ▪ PostGIS | ▪ IntelliJ IDEA | ▪ MATLAB | ▪ GitHub |

Programming Languages

- | | | | |
|----------|---------------|----------|------------------|
| ▪ Python | ▪ Java Script | ▪ C++ | ▪ Java/Vue/React |
| ▪ Kotlin | ▪ SQL | ▪ MATLAB | ▪ HTML/CSS |

Professional Experience

GIS Developer / Image Scientist - Boeing, Springfield VA

Sept 2023 – Present

- Analyze and Design, develop, and implement geospatial workflows to process and analyze large volumes of remote sensing and Synthetic Aperture Radar (SAR) data, ensuring accuracy and reliability of geospatial products.
- Apply geospatial and image processing algorithms to extract actionable features and enhance imagery for integration into GIS platforms.
- Build and refine automated data pipelines for sensor quality assessment, leveraging Python and specialized geospatial libraries to evaluate system performance at known ground truth sites.
- Conduct advanced geospatial analysis on radar cross sections, impulse response, signal-to-noise ratio, and other key metrics to improve data usability within mapping and decision-support applications.
- Perform end-to-end monitoring, troubleshooting, and optimization of remote sensing platforms, documenting results and translating technical findings into clear reports and visualizations for government clients.
- Research and recommend improvements to geospatial data collection, storage, and exploitation methods, driving efficiency and scalability in imagery-based GIS solutions.

Professional Experience (Cont.)

Cartographer – Leidos, *Springfield VA*

Sept 2022 – Sept 2023

- Developed and produced high-accuracy maritime charts, ensuring compliance with national and international standards for navigational safety.
- Conducted extensive data collection and analysis using GIS software, satellite imagery, and hydrographic survey data to support maritime operations and missions.
- Collaborated with multidisciplinary teams to create detailed maps that integrated environmental data, navigational aids, and operational zones for strategic defense planning.
- Utilized advanced cartographic techniques and software tools to visualize complex maritime data, enhancing situational awareness for military operations.
- Reviewed and updated existing maritime charts, incorporating new data to maintain accuracy and relevance for ongoing defense initiatives.
- Provided expert consultation on cartographic standards and best practices to enhance the agency's mapping capabilities and improve operational efficiency

Geospatial Analyst – *NGA, Springfield VA*

May 2022 – Sept 2022

- Analyzed and interpreted geospatial data from diverse sources, including satellite imagery, aerial photography, and LiDAR, to support intelligence assessments and operational planning.
- Conducted spatial analysis and modeling to identify patterns, trends, and anomalies in geospatial data, contributing to threat assessment and risk management.
- Created geospatial databases using SQL and Python, delivering data-driven insights for analysis.
- Improved data visualization and model development by providing repeatable Python code examples for the intelligence community.
- Delivered polished cartographic products to an array of customers to meet the specific needs and requirements of each area of interest.
- Authored and published finished intelligence products to the greater Intelligence Community.

Chief Operations Officer – *F45 Warzish group*

May 2021 – May 2022

- Spearheaded operational strategy across multiple studio locations, resulting in a 20% increase in revenue and 15% growth in membership year-over-year.
- Led and managed cross-functional teams, including studio managers, trainers, and support staff, ensuring optimal performance and consistent delivery of the F45 training experience.
- Streamlined operational processes and introduced data-driven performance metrics, reducing overhead costs by 10% and improving overall efficiency.
- Oversaw the opening of new franchise locations, coordinating build-outs, staffing, and launch marketing campaigns to ensure timely and successful rollouts.

- Managed day-to-day operations across 8 gyms in 4 states, driving consistent performance and exceeding revenue targets by 15% annually.
- Led a team of 8 General Managers and 200+ staff, fostering a high-performance culture through coaching, mentorship, and continuous development initiatives.
- Implemented strategic marketing and membership growth campaigns that resulted in a 20% increase in membership base and a 18% boost in personal training sales across all locations.
- Analyzed key performance indicators (KPIs) to identify opportunities for operational improvement, leading to a 12% reduction in expenses and enhanced profitability.

Education & Certifications

Master of Science in GIS Development and Cartography

University of Wisconsin

Bachelor of Science in Geography & Geospatial Science

Oregon State University

Associates of Science in Geographic Information Systems

Northern Virginia Community College

GEOINT Professional Certification: GPC-F

United States Department of Defense
